The only planetary astrology involved comes into play when the author discusses decanates. What is a decanate? Each sign comprises 30 degrees of the zodiac, and can be divided into three degree subsections. Each of these decanates relates to the element fire, earth, air, or water of the sign. For example, Aries is a fire sign. Aries also relates to the first 10 degrees of this sign, and is subruled by Mars. The second degree group relates to Leo, and is subruled by the Sun. The third group relates to Sagittarius, and is subruled by Jupiter. Hazleton provides more detailed information about how they express their Sun sign. For example, an Aries with a Jupiter subruler will be more playful than one with a Mars subruler.

Stuart provides compatibility guides, both for sexual and long-term compatibility. Taurus and Aries may initially experience fireworks in the bedroom, but will drive each other crazy outside of it. Finally, the author provides astrologically accurate erogenous zones for the sign in question. For example, Aries rules the head, Taurus rules the throat, and so on. A list of celebs of that sign ends each chapter. One plus of this book is that Stuart is gay-inclusive, making sure to provide graphic examples for gay men, lesbians and heteros. Most importantly, he is an entertaining writer.
