We are in the process of merging Microsoft Learning with Microsoft Learn , which will be complete by June 30, For more information, refer to the FAQ. In response to the coronavirus COVID situation, Microsoft is implementing several temporary changes to our training and certification program. Learn more. Credit toward certification:. Retirement date:. Managing Office Identities and Requirements This exam has been retired For currently available options, please see the Microsoft Certification exam list. Skills measured. Since then, 10 new users have been employed to replace 10 people who left the company over the last few months.

The employees who departed still have Office accounts. With this information in mind, answer the following questions: 1. What methods can be used to resolve the license conflicts? This name must be unique. Objective review Answer the following questions to test your knowledge of the information in this objective. Which of the following cannot be changed after you deploy an Office tenancy? Choose two. Tenant name B. Tenant region C. Global administrator D. Billing administrator 2. Which of the following Office user roles has the ability to change the password of users who are members of the global administrator role?

Global administrator B. Password administrator C. User management administrator D. Service administrator 3. Which role should you assign to help desk staff who should be able to reset the passwords of non-privileged Office users without assigning any unnecessary privileges? Service administrator C. Password administrator D. User management administrator Objective 1. Which role should you assign to staff who you want to be able to create non- privileged Office users without assigning any unnecessary privileges? To add a custom domain to Office , perform the following steps: 1. If your organization already has a domain, click Add A Domain.

The alternative is to buy a domain through Office and GoDaddy. The advantage of buying through GoDaddy is that you can have the entire process of assigning a custom domain to Office occur automatically. Microsoft requires that you perform a series of DNS configuration changes to the domain name that will prove that your organization controls and has ownership of the domain. If your account is registered through GoDaddy, you can sign in to GoDaddy to have Office automatically configure the domain for you. The value of this TXT record will be different each time you run the wizard.

Office will then attempt to verify that the record has been correctly added by performing a DNS query. Depending on DNS propagation delays, this might not occur immediately. Click Skip This Step to avoid updating these users. The next page is the Add New Users dialog box shown in Figure You can click Skip This Step to bypass this page. You can choose not to set up these records by clearing the check boxes them at this step and performing this task later. Once you click Finish, the custom domain will be listed in the list of domains as shown in Figure For example, you might want to use one custom domain as an email suffix, and another custom domain for use with Skype for Business. To configure domain purpose, perform the following steps: 1. In the Office Admin Center, click Domains. Select the domain for which you want to configure and then click Manage DNS.

Select the services that you want to configure for Office If you click Add These Records Yourself, the wizard will provide you with the list of records that you need to add to support the selected services as shown in Figure Move ownership of DNS to Office You can change the name servers that host your custom domain from the original registrar to Office The method that you use to do this depends on the domain registrar that currently hosts the records that point to the name servers associated with the custom domain. You can only move ownership of DNS to Office if you have gone through the process of confirming that your organization owns the domain through the configuration of the ap- propriate TXT records.

Fabrikam has signed up for an Office subscription and is currently using the tenant name Fabrikam. Fabrikam wants to assign their custom domain, Fabrikam. What kind of DNS record must be added to confirm ownership of the Fabrikam. You are in the process of moving ownership of the Adatum. Which of the following names should be configured as nameservers as a part of this process?

Which record type must you configure to route email from a custom domain to Office once domain ownership has been confirmed? TXT C. SRV 3. SRV B. TXT 4. What type of record do you need to configure in your custom DNS zone to allow Office to confirm that your organization owns this zone? TXT B.
